In pursance of this acceptable plan, there will be a Z uave antertainment at the Academy of Music to-morrow (Thursday) evening, at so clock. Col. Pinckney of the Sixth Regiment will have charge of the siffair. At his suggestion, Col. Butterfield of the Twelfth Regiment will conduct the escourse music at intervals during the drill, which will brende several exploits not yet witnessed. The price of a tick-than been fixed at 16ty cents, and no seafs will be reserved. The proceeds will be devoted to defraying the crapment of the arthibition.

The sister cities are growing impatient for the corps. Communications or received from the intended military hosts in Buston and Philidelphia, desiring definite information of their movements.

THE PRIZE RING IN AMERICA. A Challenge-Ite Acceptance and a Dis-

[From the N. Y. Herald, 18th.]
In yesterday's Herald we published owing challenge, purporting to be from Morrissey, "the champion of America: lowing challenge, purporting to be from John Morrksey, "the champion of America:

To THE REFITOR OF THE REFALL.

As Mr. John C. Heenan has now arrived home, and as he has, when in Europe, expressed so fervest a wish to fight me again. I will not balk him in his wish, now I have him on the spot. I will fight him in four months from signing articles, for from ten dollars to ten thousand a s de; and as it appears paradoxical to me-and my friends to see a man dubbed "champion of the world" who has never won a fight in the ring, I will now gwe him the chance he wants, although I only stipulated to fight him again as a winner. I will meed him when and where he likes—put up what forfeit he likes—fight him when and where he likes—put up what forfeit he likes—fight him when and where he likes—to choose the stakeholder, to be agreeable to both. I trust oquisiders will not interfere to prevent this match—at least until the money is up, which I am prepared to stake at drawing up of articles.

The letter was handed in at our office in the mean match—at least until the money is up, which I am prepared to stake at drawing up of articles.

TO THE EDITOR OF THE HERLED.

I have noticed with much unispaction that
John Morrissey declares he will keep the promise made to me before I went to Europe, and
give me a second meeting in the ring. This in
itself pays me for the time I spent in England,
and I as ones accept of all the terms he offera,
and choose for the stakes the highest sum he
names. In proof thereof I will place is say responsible man's hands the sum of \$3,500 as a
preliminary deposit for a match of \$10,000 a
side, pending the drawing of the articles and
the selection of a stakeholder. I should have
head a few weeks of Islance to sulpy among my
friends; but as there is no way in which I can
be gratified so much as by being guaranteed an
early fisieth with Morrissey, I hope they will
accuse me for this new occupation of my time.
If it. Morrissey will send me word by note
when and where he desires to see me for the
arrangement of preliminaries, I will meet him
without delay; and the only further wish I aow
desire to express is that, like the stakes, the

The President and Cubinet recruity made all sorts of promises to Congress that the laws for the suppression of the slave trade should be respected, and carried out to the fullest extent. We believe one case did arise m which the Government attempted something of the kind, but the effort was transitory, and appears to have exhausted itself in that special instance. The crime is still carried on to an enormous extent, and many arrivals of reasels at Southern ports are those of alavers, landing their cargoes of stokes asgress upon our shores, and respensibiling the supply of slaves in the Nouth. Delyon Monday last a cargo of one hundred and twenty, four Africans were landed from the schooner (Jotilles at Mobile, one of the other ports of the Scuth, and, we are bound to believe, in the face and eyes of the officials of the Federal Government. Huribut's Patent Stave Machin Among the list of patents issued from th United States Patent Office for the week endin July 3d, 1860, we notice the following paten granted to W. W. Huribut of Muscatine, lowe and J. S. Huribut of Chicago: They claim first, the arrangement of the saws and man of adjusting them to any required angle, to cut

sm.l er diameter. Second, the stave cut straight from each outer edge to the centre, forming any required angle, in the manner as above descri-bed or its equivalent. We saw the machine in full operation yester-day, at N. S. Bouton's Machine Shop, South Clark street. It is very simple and chesp in construction, and is adapted to the manufacture of stares for augar and molasses hogsheads, rice and tobacco casks, nail kegs, &c., &c., but its great forte is, the manufacture of stares and heading for tight work, for which purpose it undoubtedly excels all other machinery. The machine is changed for sawing different length stares in a very few minutes, and its as quickly changed from stares to heading.

The machine is complete in every respect, and works beautifully. All persons who are looking for anything in their line will do well to call upon Mears. A SHEW CHAPTER.

A few days before his noninstion as the neidate of the Douglasites for the Vice saidency of the United States, to wit, on a 28th day of May, 1880, Herschel V. Juhnan wrote a letter on current political topics, on which we cut the following choice paramph, for the consideration of the equatter

and associations; they may regretfully give ap the leader of their choice; but they have no option. There is behind them that mexorable positional legic which honest men cannot resist. Upon those with whom politics is a game, who are undifferent to all considerations which do not centre in, self, who do not care whether Shavery is voted up or voted down so that they have their reward, no logic or patrictism can be brought to bear. The inquiry as to their action is not worth the words required to make it. We are sure that there is free. ill factions combined. Mark the prediction

which have led to the enslavement of his course which have led to the enslavement of his course which have led to the enslavement of his course which have led to the enslavement of his course tieved of the ciril instruments of tyranny, was to seed the members of the so-called religious order, upon which desposits has always relied for support, trooping after them, minus the ill-getten wealth in money and land which they, sided by the povernment, have wrung from the fears of the people. Of course this decisive action of the liberal chieftain will excite the direct wrall of the Catholic world. The organs of despotism in Rome, Spain and Austria will how again with impotent rage; and the "faithful" in this land, which Jeauitism is striving to conquer, will be called upon the leave of the course of the subject of the Democratic papers of Ohio), from Donglas to Lincelly. Will the coff-rs of Judge Doughas be again invaded that the Jesuits may be restored to the place from which Carricaldi has driven them out, and that the exchepuer of the Popemay be replantated? Will not the priests, bishops and laymen of the Cathelic Church, who for remose of their own, which shread man one guest, go for him on masses, exact that as the price of their continued anyport?

The Harmonious in Pennsylvania. The war of the factions in Pennsylvania is waxing hot and bitter. The rest rans through the middle of the party and bets are being made as to which segment will poll the most votes. An attempt was made the other day to held a Convention of hoth wings in Columbia county, one of the old strongholds of the Democracy. But the irrepressible conflict was too strong for the cabasia attention of paths planter and the Convention was rest in twain. Some 50 delegates pronouncing for Breck and 28 for Duly. Two Conventions were then organized. At the Breckturidge meeting, C. D. Murray made a speech, in the course of which he is reported to have said.

iowing very schielt and astratactory reasons are given by the editor, D. M. Fleming, Eag., for this course:

We demanded as a condition precedent to our support of the Charleston Bultimore nominees, that the platform adopted should recognize the great doctrine of Popular Sovereigney. After hoping against hope, this principle was repudiated by both wings of the party to which we had for long years given a cordial support, the one holdy avowing the doctrine that the Congress of the United States were bound to enact laws for the protection of slaver, in the Territories, and the other shoots blanking the Pred Scott decision a part of their pointical creed. On these two platforms are plated menimes, and on aupport demanded.

The position has been familiar to our quondem political associates. We have openly avowed our most inqualified opposition to the principle that the Constitution recognized or protected slavery in the Territories, and to this other modern political heres, aslaw Code, in no unmeasured terms. We demanded the most pier feet freedom to the people in the Territories, with the right guaranteed them not only to regulate their own affairs in their own way, to require their own refined to restore required to swallow breechingles. giving them Popular Sovereignty in the true sense of the term; but we have got neithe and are discovered to swallow Breckingto, and Lane with a Slave Code, or Douglas as Johnson and the Dred Scott decision with it Southern interpretation; or go out of the play to which we have ever belonged. We have the litter.

We therefore place, the same of Atreaham Hancoln at our must head, and precision bim as our choice, for President of these United States, believing that a generous public will suntain us in the schoping the right.

The Enquirer (unlike the Folice of this, city, which has het yet waken to hake any allusion to the subject, then copies the minority report made by the Douglastie candidate for Vice President, Morabel V Jedinson, six weeks ago, in denanciation of "Popular Sovereignity" and favoring a Slave Code for the Terricories, and adds:

Upon these resolutions when they shall be put on their passage, I shall be compeded to vote; so that I cannot be silent if I would.

As before observed. Mr. Lincoln did not and be silent if I would."

As before observed, Mr. Lincoln did not stand alone in holding these views. They were held substantially by the entire Whig party, both at the North and the South; as well as by Mr. Calloque and those Southern men who at that time had adopted his peculiar political opinions. Farmers say that these peals have not this year been as destructive as usual. Burning the ambibe is one mode of destruction recommended; rolling the land immediately after sowing is another; deep fall plowthy as a third, and we consider it the best. In the notthern chales this periodicus insect makes its appearance about the last of May or first of June, and a little later further north secording to the senson. Ury seasons seem to be more favorable to it than wet. The perfect insect deposits its aggs in the ground during the latter part of summer or early fall, and the warmth of the ensuing spring develops the young, (lava) which soon betakes itself to the nearest wheat, corn, grass, or other vegetable finiter suited to AGRICULTURAL.

OUR WEBST COOP.

No well informed men will pretend that estimates in advance of the wheat crop of this country can be anything but more greenes; and yet we can predict with agfort that the aggregate yield this year, not alone in Illinois, but taking in the whole country, will be ahead of last year. It is also certain that the home consumption in the United States does not keep pace with the increase of population. Our people, both in city and country, consults more meat than formarly, more core, more roots more vegetables. Buth is the variety of our resources, that half is wheat crop would achieve the country and the propulation of the continue; because wheat is a dearer food than core, or roots and regetables, and not more palatable or nutratious, Eventually, it will reach its natural level, and there remain. The following table shows the population of the contrary at four periods, the amount of wheat raised—the figures for 1859 being setimates, and the imports from Canada being considered as event to the croots:

This year, in all probability, the European market will be high; it may be so next year, and the year following; yet bitter experience has taught us not to depend upon Europe. Its great cereal is wheat. Only in the Southern nations is corn raised, and there not extensively. And wheat in Europe is just as sure a crop evil might in a great measure be removed.

CHEMEN MAXING IN WINYER.

A correspondent of the flavoi New Yorgards the present practice of making the summer both abserd and expensive winter, he says, is by far the best time to notheres, because the milk is sinker, more managed, and there is no danger from fice souring of reasels. There is also more and milk can be produced theaper, and better quality than in summer.

WALKING BOOKES. ly. And wheat in Europe is just as sure a crop as in America. In 1858 the yield in the whole Northwest was about half an average. Within better quality than in summer.

WALKING ROSSIS.

A correspondent of the Country Gentle suggests the offering of premiums at an country fairs for last walking as well as trotting horses. He says be knew a man kept from two to four teams at work or road, and never allowed them to trot at all he made the distance in quicker time than neighbors, who made their horses trot as convenient place. He said that when a I walked after trotting, he walked much sithan his common gait, if kept continuall the walk.

INE GARDAN.

In a garden, on a second terrace or aloping land, near the Ohio river—sub-soil deep red, probably the decomposed rocks of the "Barrens Ilmestons"—surface soil dark chocolate color, containing considerable quantity of fine sand—two rows of peas had been planted (Marrowfat, Daniel O'Rout, or a species of climbing pea). When the plants were about six inches bigh, about half of one of the rows, say twenty fest in length, was limed with a surplus quantity of lime, which had been procured for whitewashing, the lime had air slacked perfectly, and being in the way and supposed to be spoiled, to get it out of the way it was taken into the garden and distributed slong part of one of the rows of growing peas. When the growing peas were observed and the above statement received, the condition of the crop was in this wise. The row and a balf which had received no lime was in good growing condiin former articles.

Let be spring time "mouldy corn" is a very common complaint. Well, what makes mouldy corn? Did anybody ever hear of a sound car of corn being hung up in a dry place and spoiling? Certainly soc. And why? Simply because it had plenty of air; it was well vantilated. Now, only a foolish man will lay away unsound corn in a cry. All sacks should be ind corn in a crib. All such she and let it be composed of narrow strips, so far apart as to allow ventilation, and yet not so wide as to let ears wedge in between and preent the tree use of a shovel. Let the siding b
